

What  
is  
Digital Citizenship?

Digital access is necessary  
for all citizens regardless  
of their socioeconomic  
status.

All teachers, students, and  
parents need to practice  
good netiquette when  
communicating online.

Technology should be  
meaningfully integrated  
into teaching and learning.

Intellectual property rights  
should be respected.  
Open resources should be  
used where possible.
